

DOG & CO[®] *Wellness*

NO ARTIFICIAL PRESERVATIVE

Although if they are permitted by law, we chose not to add any additives in the production process, such as synthetic preservatives. The freshness and nutritional characteristics are preserved by advanced systems of production and by the use of raw materials that, thanks to their antioxidant characteristics, can preserve foods in a natural way.

CRUELTY FREE

We can be proud of being the first company in Sicily and one of the first ones in Italy in this sector, to have received the environmental certification (ISO 14001), which is synonymous of a special sensitivity to the environment and animals. In addition, to prove an increased attention to animal welfare, our company does not make nor commission useless animal testing.

NO GMO

Our animals deserve all the available quality and genuineness, so we guarantee the provenance of all the ingredients and we use only raw materials that do not contain genetically modified organisms and that meets our strict standards of quality.

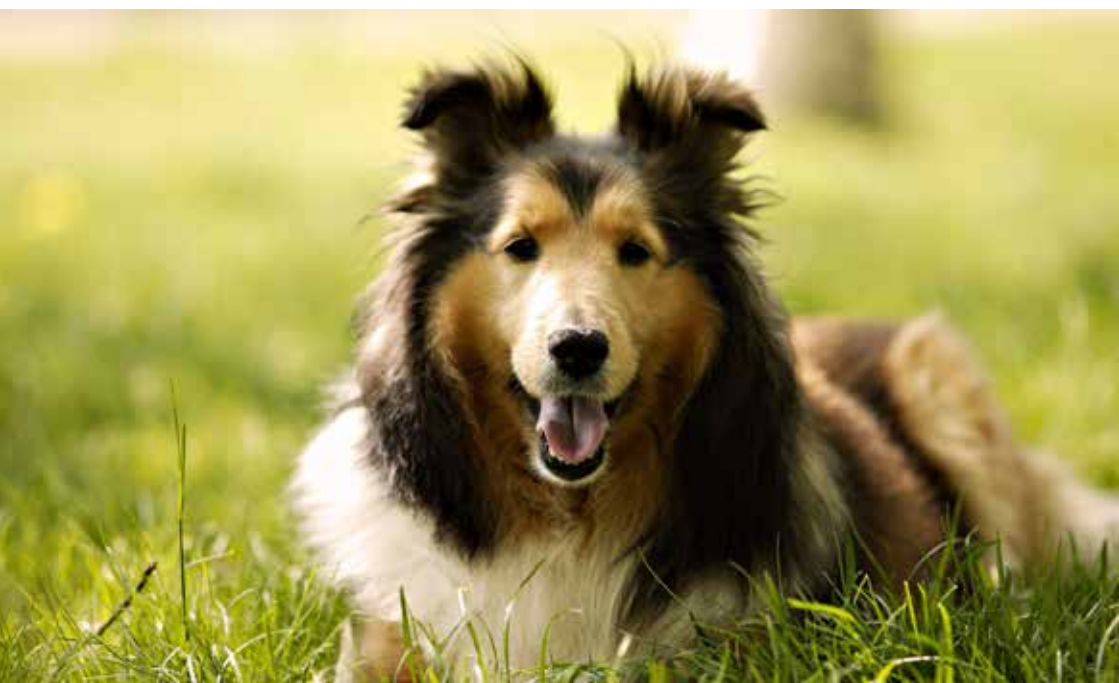

With its forty-year experience in animal nutrition, all along Adragna Pet Food offers high quality products for dogs & cats.

The company is able to assure its products high quality thanks to different factors. First of all, Adragna chooses prime raw materials shopped at local suppliers, (as warranty of genuineness and quality). All the materials are also checked by careful analysis. Secondly, the company uses highly advanced plant, result of last technological innovations in dogs and cats nutrition field. At the end, Adragna 's staff is and specialized and well motivated by real love for pets.

From 2001, the company has obtained the Quality Certification according to rules UNI EN ISO 9001, and it proof its continuous attention to improvement of production and marketing of own pet food.

To love own job and animals, also means to love and respect environment; for this, Adragna Pet Food, has also obtained Environment Certification according to rules UNI EN ISO 14001.

Adragna is, first of all, a familiar company and it is its strong point. It allows to establish direct and clear relationship with costumers and suppliers. The company is able to satisfy needs of its costumers with flexibility and promptitude. Adragna recovering motto: "We are what we eat", formulates high quality and checked products, adapt for dogs' and cats' different needs.

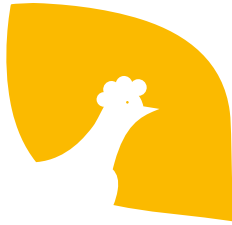

DOG&CO[®] *Wellness*

Dog & Co Wellness is the new line of functional foods inspired by the Mediterranean tradition and holistic philosophy, not tested on animals (Cruelty Free) and created by Adragna to meet the nutritional needs of dogs of all sizes and ages, starting from all our passion and experience and on the basis of the best scientific knowledge.

The various products, made without the addition of artificial colorings or preservatives, are formulated using not genetically modified (GMO free) raw materials of high quality, which are carefully selected and highly digestive.

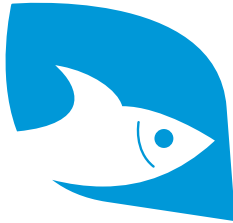

Dog & Co Wellness can satisfy the nutritional needs of dogs and can promote the normal balance of the body through the use of physical, "functional" ingredients (nutraceuticals) that naturally contain beneficial substances with antioxidants and other substances with sedative, digestive and choleric properties. The use, as a primary source, of animal protein, an highly digestible protein and of high biological value, represents a great help in fighting the phenomena of food sensitivities as well as in promoting, together with the use of nutraceuticals, the health of the gastro-intestinal tract, with the maintenance of a good physical shape.

CHICKEN

It derives exclusively from chickens raised on the ground without the use of estrogens or growth hormones, it is an important source of very digestible proteins, rich in essential amino acids, very important for protein synthesis, and of amino acids with branched chain, which are very important for the metabolic functions. It also contains a good amount of minerals like potassium, sodium, iron, magnesium, calcium and zinc.

FISH

It is an exceptional source of protein of high biological value and contains, if compared to other sources of protein derived from meat, small quantities of connective tissue, resulting therefore much more digestible. Fats contained in fish are mainly of unsaturated type and with a high concentration of omega 3 of which the benefits for the body are well known and scientifically proven. Furthermore, the phospholipids, which are important fats in nerve function, are present in good quantity and there is also a discrete presence of calcium, phosphorus and iodine.

LAMB

The lamb meat, comparable from the nutritional point of view to the white meats, is easily digested and well tolerated by the body and it is therefore recommended as an alternative also in case of food allergies. The lamb is a food rich in animal protein with a high content of essential amino acids. Furthermore, from the nutritional point of view, it has a reasonable content of proteins and is low in calories, so it can be recommended even in low-calories diets.

OLIVE OIL

This product originated from the traditional food of the Mediterranean area and it is characterized by a very high content of monounsaturated fatty and highly digestible acids. Rich in antioxidants (phenols and tocopherols) it has a beneficial effect against cardiovascular system (anti-hypertensive) and it provides a strong support in countering the damage associated with oxidative stress.

ARTICHOKE

It is a typical Mediterranean plant. It represents a natural diuretic and it can improve digestion by stimulating the production of digestive juices; its cleansing properties result from the presence of cinarina, a flavonoid that has been shown to have important beneficial antioxidants and hepatoprotective properties.

TOMATO

This typical ingredient of the Mediterranean tradition, is the richest vegetable in lycopene, a carotenoid with strong antioxidant capacities that has protective effects thanks to its ability to counteract some "aggressive" compounds for the body, such as free radicals.

ROSEMARY

It grows wild in the Mediterranean area and it is known to have beneficial properties on the organism. It is more and more used in animal feed, and not only, due to its stabilizing effect regarding to lipid peroxidation and its supportive effect in countering the presence of some intestinal parasites.

CHAMOMILE

The chamomile, with its good anti-inflammatory and phlebotonic properties, is typically used for its anti-inflammatory and antispasmodic properties on smooth muscles of the digestive tract, in addition it is known to have healing, antibacterial and antifungal properties, helping to counteract inflammations of the gastro-intestinal tract.

ADULT ALL SIZE *Lamb & Rice*

Size: 3kg - 12,5kg

Composition: dehydrated animal proteins (lamb 19%); maize; wheat; rice (8%); animal fat; hydrolysed animal proteins; citrus pulp, dried; carob; beet pulp; brewers' yeast; linsee; olive oil(1%); sodium chloride; chestnut wood (natural source of tannin); dried rosemary (*Rosmarinus officinalis* L.) (0,25%); dried tomato pulp (*Solanum lycopersicum* L.) (0,1%); dried artichokes (*Cynara scolymus* L.) (0,05%); camomile flowers (*Matricaria recutita* L.) (0,04%); fructo-oligosaccharide.

Analytical constituent: Wet 9,00%, crude protein 24,50%, crude oils and fat 14,00%, crude fibre 3,00%, crude ash 7,50%.

Additives (per kg):

Nutritional Additives: Vitamin A 13.000 IU - Vitamin D3 1.000 IU - Vitamin E 125 IU - Vitamin B1 5,00 mg - Vitamin B2 6,00 mg - Vitamin B3 20,00 mg - Vitamin B6 4,00 mg - Vitamin H (Biotin) 0,50 mg - Vitamin K 1,00 mg - Vitamin B12 0,03 mg - Folic Acid 0,70 mg. - Coline 1.000,00 mg - Iron (ferrous carbonate) 100,00 mg - Iodine (calcium iodate) 1,20 mg - Copper (Cupric sulphate pentahydrate) 40,00 mg - Manganese (Manganous oxide) 50,00 mg - Zinc (zinc oxide) 150,00 mg - Selenium (Sodium selenite) 0,20 mg - DL - Metionine 1.500,00 mg. Antioxidants.

RECOMMENDED DOSES

Adult weight	1kg	5kg	10kg	15kg	20kg	30kg	40kg	55kg	70kg	90kg
Ration in gr	32	100	170	230	285	380	480	590	690	820

ADULT ALL SIZE Chicken & Rice

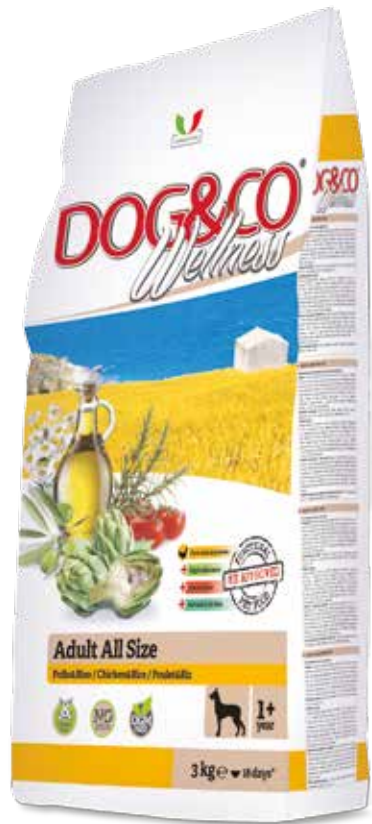

Composition: dehydrated animal proteins (chicken 28%); maize; wheat; rice (8%); animal fat; hydrolysed animal proteins; citrus pulp, dried; carob; beet pulp; brewers'yeast; linsee; olive oil(1%); sodium chloride; chestnut wood (natural source of tannin); dried rosemary (Rosmarinus officinalis L.) (0,25%); dried tomato pulp (Solanum lycopersicum L.) (0,1%); dried artichokes (Cynara scolymus L.) (0,05%); camomile flowers (Matricaria recutita L.) (0,04%); fructo-oligosaccharide.

Analytical constituent: Wet 9,00%, crude protein 24,50%, crude oils and fat 14,00%, crude fibre 3,00%, crude ash 7,70%.

Additives (per kg):
